

Our Advantages

Higher Energy Savings through using highly efficient products and superior system controls

Improved Indoor Comfort will make tenants feel more satisfied and stay longer

Fully Automatic system operation - meaning no user interaction required

Landlord Extraction

Our Landlord Extraction system has been specifically designed to automatically extract damp air from your tenants bathroom, to maintain high Indoor Air Quality and prevent mould and mildew from growing.

On-Demand Extraction is the best way to protect the house from condensation and mould damage, keeping the bathroom fresh and tenants happy.

BATHROOM HUMIDITY LEVELS

Our System

Our extraction systems use custom-made, fully automatic fans with built-in sensor controls, to provide you with the best protection for you and your bathroom. These fans constantly monitor the humidity levels and adjust the extraction rate as needed, to remove all excess moisture from your bathroom - without ever needing to flick a switch.

All EVOAQ Extraction Systems comply with the new 2019 Healthy Homes Standards

Extraction Systems	VX125N	VX150N (upgrade)
Bathroom Size	Up to 9m ²	Above 9m ²
Voltage (V/Hz)	230/50	230/50
Power (W)	1 - 17	3 - 73
Air Flow (m ³ /hr)	63 ~ 284	65 ~ 650
Static Pressure (Pa)	159	457
Noise (dB)	28	31
Speed (RPM)	250 - 2250	500 - 3000
Weight (kg)	1.4	2.5
Specific Fan Power (SFP)	0.175 Watts per L/s	0.398 Watts per L/s

HIGH VELOCITY
CONE DIFFUSER

HIGH FLOW EC MIXED FLOW FAN

LOUVRE GRILLE

ALUMINIUM
NUPE DUCTING

Demand Controlled Ventilation

Our extraction systems use DCV - the extraction rate is automatically adjusted according to fluctuating humidity levels, using our built-in intelligent controller which constantly monitors the bathroom air to regulate the level of extraction.

Our specialised software determines the right fan speed in order to maintain low humidity and minimize moisture damage within your bathroom.

Continuous Extraction

By combining our DCV controls with highly energy-efficient EC fans, our systems can use high airflows when extraction is required the most.

Additionally, the system keeps running at very low levels even when the bathroom is not in use, to continue removing any excess moisture from the bathroom.

This is how our systems are able to extract continuously, where others would turn off.

Available Upgrades - Backdraft Shutter - ABS Egg Crate Grille - Stainless Steel Cowl
